

## SolarGrid Energy Solutions

# Venezuela Solar System

## Overview

---

How much solar power does Venezuela have?

According to the latest statistics published by the International Renewable Energy Agency, Venezuela had around 5.32 MW of installed solar PV power generation capacity in 2019. In 2019, the Venezuelan government announced a plan to build its first utility-scale PV project to strengthen its National Electric System.

Why is solar energy becoming more popular in Venezuela?

Solar energy is one of the fastest-growing forms of energy in power generation that is expected to show a gradual increase in the energy mix of Venezuela. This tendency is maintained by the significant decrease in the cost of renewables with the support of investments and new technologies.

How will solar energy impact the energy transition in Venezuela?

Energy Transition: The global trend towards clean and sustainable energy sources will influence the energy transition in Venezuela. Solar energy will play a vital role in reducing greenhouse gas emissions, meeting renewable energy targets, and diversifying the energy mix.

Can solar energy be used in isolated rural communities in Venezuela?

It aims to develop the use of renewables within isolated rural communities includes solar. The future development of the solar energy sector in Venezuela with the growth of energy consumption and substitution of fossil fuels by renewable energy potential is likely to promote the solar energy market in Venezuela.

Why should you invest in solar energy in Venezuela?

Solar energy will play a vital role in reducing greenhouse gas emissions, meeting renewable energy targets, and diversifying the energy mix.  
Investments and Partnerships: Increased investments, both domestic and

international, are expected in the Venezuela Solar Energy Market.

Does Venezuela have a solar panel factory?

The engineer says: “It’s incredible, but in Venezuela, in the industrial region of Paraguaná, we have a solar panel factory, but it doesn’t have any staff. There’s materials in the storage facilities to produce for three years and supply the entire country with alternative systems.
