# **Victoria Solar Air Conditioning**

## Overview

---

Who is Victorian heating & cooling?

Victorian Heating & Cooling is dedicated to helping you with home electrification. In addition, we work closely with programs like VEU, Solar Victoria, and CES. Therefore, our goal is to provide cost-effective heating and cooling solutions. We also promise excellent service.

Where are Victoria's top solar installation suburbs?

Top installation suburbs included Campbellfield, Dandenong South, Cheltenham, Truganina, Thomastown, Carrum Downs, and Epping. Reporting data for the Solar Homes Program, including retailer rebate allocations and the program's impact on Victoria's solar industry.

How much money will Victorian government spend on heating & cooling?

The Victorian Government is investing \$335.5 million over four years to provide efficient, low-cost heating and cooling for low income and vulnerable households. The grants, starting on 1 July 2021, will help 250,000 households.

Can a rec electrician install a reverse cycle air conditioner?

Provided through Solar Victoria, the grants will help households install high-efficiency reverse cycle air conditioners, replacing inefficient heaters. An A-class electrician working under a registered electrical contractor (REC) can disconnect and make safe the wiring associated with the decommissioning of an existing heating and cooling unit.

What is Energy Safe Victoria?

Energy Safe Victoria is the State's regulator for electricity, gas and pipelines safety. Our role is to ensure that Victorian gas and electricity industries are safe and meet community expectations. We are also responsible for licensing and registering electricians and educating the community about energy safety.

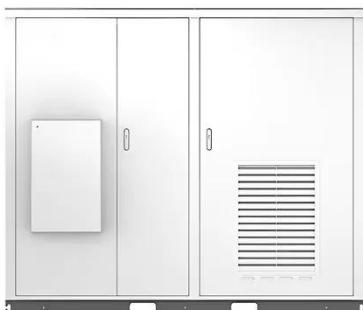

Can an a-Class electrician install a new air conditioner?

As with new air conditioner installs, an A-class electrician working under an REC can carry out the full installation of a replacement air conditioner, including altering or replacing any wiring.
