

**SolarGrid Energy Solutions**

# **Vienna large UPS uninterruptible power supply price**

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) protect the 24 V supply voltage against unexpected power failures. In the BLOCK portfolio, capacitive UPS solutions provide 24 V DC power supply for up to several minutes. Equipped with ultracapacitors, these solutions are designed for long service life and operation in demanding temperature ranges.

Where are uninterruptible power supplies sourced?

Uninterruptible power supplies are sourced from trusted manufacturers. They're part of our collection of power supply products & protection devices, which protect a load from dangerous changes in power supply.

What is a capacitive ups based on ultracapacitors?

The capacitive UPS based on ultracapacitors provide the highest level of system availability in the field of 24 V DC uninterruptible power supplies. With a broad portfolio designed for various requirements and applications, they ensure uninterrupted power supply with currents of up to 40 A in the event of a power failure.

What is an uninterruptible combined UPS system?

The uninterruptible combined UPS units include an economical 24 V DC switched mode power supply with an integrated charge and control unit for optimal battery management. These space-saving combined UPS systems control and monitor the connected battery modules, providing early warnings when battery life expectancy is low.

What is a Hybrid UPS?

Hybrid UPS - This system consists of three modes: double conversion mode, economy mode, and active filter mode. The UPS automatically selects the power feeding mode to best suit the power situation and load conditions. It is

possible to shift between the respective modes with no momentary break in output voltage.

Why should you choose a battery UPS system?

Battery UPS systems ensure maximum system availability through intelligent battery management and short charging times – even with large battery capacities. The charge and control units with integrated decoupling reliably protect your systems against failures, ensuring a continuous DC power supply.

## Vienna large UPS uninterruptible power supply price

---

### Uninterruptible power supplies , BLOCK

Uninterruptible power supplies (UPS) protect the 24 V supply voltage against unexpected power failures. In the BLOCK portfolio, capacitive UPS solutions ...
