

## SolarGrid Energy Solutions

# Vietnam Ho Chi Minh Photovoltaic Glass Carport BESS

## Overview

---

Is a large-scale battery energy storage system (Bess) being deployed in Vietnam?

Steps forward have been taken for the first pilot deployment of large-scale battery energy storage system (BESS) technology in Vietnam.

Is battery energy storage systems a new wave in Vietnam?

A New Wave in Vietnam's Energy Sector: Battery Energy Storage Systems (BESS)! Vietnam is at the forefront of a transformative shift towards renewable energy, with Battery Energy Storage Systems (BESS) emerging as a cornerstone technology in ensuring grid stability.

Can battery energy storage be commercially viable in Vietnam?

The BESS project aims to demonstrate the commercial viability of battery energy storage in Vietnam and showcase the practical benefits of renewable energy, including its reliability and efficiency. It also seeks to help Vietnam meet its climate action targets.

How can Bess help Vietnam achieve energy transition objectives?

Beyond grid stabilization, BESS plays a pivotal role in advancing Vietnam's energy transition objectives. By effectively managing energy supply and demand, BESS contributes significantly to achieving targets for renewable energy adoption and diminishing reliance on fossil fuels.

Can energy storage help Vietnam meet climate goals?

Co-funded by a grant from U.S. Mission Vietnam, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate goals.

How will Bess work in Vietnam?

The legal framework for BESS in Vietnam is still developing, but it will likely build upon existing energy laws. The Law on Electricity provides the overarching framework for the power sector, while specific regulations will need to be developed for BESS.
