

# **Vietnam communication base station wind power project**

## Overview

---

Is Vietnam building a roadmap for offshore wind power development?

Vietnam has been building a roadmap for offshore wind power development which requires a long-term process, thorough preparations in human resources, infrastructure, and especially a clear legal framework.

What is the largest offshore wind project in Vietnam?

This is one of the largest offshore wind projects in Vietnam, being developed by Mainstream Renewable Power in collaboration with local partners. Located off the coast of Soc Trang province, the project has a planned capacity of up to 1,400 MW. It will be developed in multiple phases, with the first phase expected to provide 400 MW of capacity.

What are Vietnam's wind power policies?

Vietnam's wind power policies are designed to promote the development of wind energy as part of the country's broader renewable energy strategy. These policies aim to attract investment, facilitate project development, and ensure a stable and supportive regulatory environment for the growth of the wind power sector. Key elements include:.

Who are the key players in Vietnam's wind power industry?

Gelex Group is another key player in Vietnam's wind power industry, focusing on the development and operation of wind power projects. The company's wind farms are primarily located in the central and southern regions, contributing to the local electricity supply and supporting Vietnam's renewable energy targets.

Can Vietnam make a successful energy transition without offshore wind power?

"Vietnam will not be able to make a successful energy transition without developing offshore wind power. Vietnam has a great coastline, great

renewable energy resources, actually the best in South East Asia.

What is Vietnam's wind power potential?

Vietnam has an offshore wind power potential of more than 1,000 GW, according to a recent report by the National Center for Hydro-Meteorological Forecasting (NCHMF), UNDP, and the Norwegian Embassy. The figure is far from previous assessments by the World Bank and the greatest wind power potential is in Bạc Liêu-Cà Mau and Ninh Thuận-Bình Thuận.
