

## SolarGrid Energy Solutions

# Warsaw wind power system

## Overview

---

Does Poland have a wind power sector?

The history, current state and prospects for the development of the wind power sector in Poland have been presented. Poland has a long tradition of using wooden windmills, mainly post mills for economic purposes. Basing on the data of the Institute of Meteorology and Water Management, the speed of wind was calculated in Poland at a height of 100 m.

What is a wind farm in Poland?

Wind farms are groups of wind power plants that use wind energy to generate electricity. How great is the wind energy potential in Poland, and what are the benefits of building wind farms?

According to a report by the Polish Wind Energy Association (PWEA), Poland has the potential to install over 50 GW of wind power onshore and offshore by 2050.

Are wind turbines produced in Poland?

Although complete wind turbines are not produced in Poland, the production of components and accompanying equipment for the wind power sector is significant and has a huge development potential. The wind power sector in Poland employs about 5000 people.

When was wind first used in Poland?

The first papers on use of wind as a source of energy in Poland appeared in the 1980s . The first extensive expert assessment of the wind power resources in Poland was the paper by Halina Lorenc in 1996 .

How many jobs do wind farms have in Poland?

The wind power sector in Poland employs about 5000 people. Assuming the full utilisation of the market potential, the number of jobs in the wind power

sector could grow to about 60,000 in 2020 . A positive impact of wind farms on communes' budgets also matters.

How can wind power improve the air quality in Poland?

The development of the wind power sector is an opportunity to reduce the emission of greenhouse gases, which will also help to improve the air quality in Poland. As a result of the power and heat sector that is based on coal, the air quality standards are not met in many regions of Poland throughout most of the year.
