

SolarGrid Energy Solutions

Wellington private solar air conditioning

Overview

How does solar energy work in Wellington?

Wellington's sunlight ensures that solar panels can consistently produce a substantial amount of clean energy. The electricity produced by solar panels is in the form of DC current, while most homes and businesses in Wellington use alternating current (AC). To make the solar energy usable, solar inverters are employed to convert DC into AC.

What are the benefits of solar power in Wellington?

One significant advantage of solar power in Wellington is when solar panels produce more electricity than needed, the excess energy can be fed back into the grid. This process allows consumers to earn credits, reducing their overall energy bills and contributing to the city's sustainable energy goals.

How do solar panels work in Wellington & Kapiti?

These panels are designed to absorb sunlight and convert it into electricity. The solar panels Wiretec Electrical install in Wellington and Kapiti are specified high wattage solar panels specially designed to capture even the faintest rays of sunlight, making them highly efficient on Wellington's cloudy days.

Why are solar batteries gaining popularity in Wellington?

For those seeking to enhance their solar energy systems further, energy storage solutions are gaining popularity in Wellington. Solar batteries can store excess energy generated during the day for use during periods of low sunlight or peak energy demand, providing greater energy independence and resilience.

Who is a solar power company?

We are an electrical and solar power company based in Wellington, New Zealand. Our company provides top quality solar power and electrical installation's at affordable prices. We take pride in our work and travel all

around New Zealand installing solar power whether it be a grid connect system or completely off grid altogether.
