What are the outdoor power supplies in Antwerp Belgium

Overview

What are the different types of power plugs in Belgium?

In Belgium, there are two main types of power plugs and outlets: Type C and Type E. Type C: Type C plugs have two round prongs on either side of the plug, commonly known as Euro plugs. Mostly used in Europe, South America, and Africa. Type C outlets can be fit with either Type E or Type F plugs.

What type of power outlet does Belgium use?

Belgium's power outlets are type E. These are typical European sockets that appear pushed deeper into the wall than the standard American outlets. The outlet has space for two round 4.8-mm prongs that are 19mm apart, and it has a small rod coming out of the top of the outlet that fits into your adapter or Type E plug.

How to buy a power adapter for Belgium?

It is recommended to purchase a universal power adapter that includes the type E plug adapter. These adapters often come with interchangeable plugs, allowing you to use them in multiple countries. To summarize, when buying a power adapter for Belgium, make sure it includes a type E plug adapter.

What voltage does Belgium use?

Belgium operates on a standard voltage of 230 V and a frequency of 50 Hz. The power plugs and sockets used in Belgium are of type E. These sockets have two round pins and are compatible with plugs of type C, which have two round pins as well.

Which sockets are compatible with power outlets in Belgium?

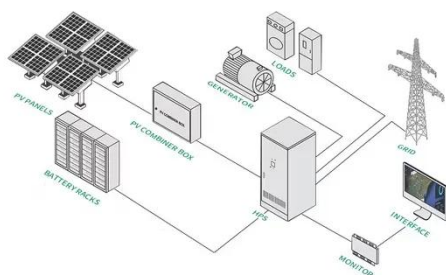

These sockets have two round pins and are compatible with plugs of type C, which have two round pins as well. To ensure that your devices are compatible with the power outlets in Belgium, you will need a power adapter that converts the shape and size of your current plug to fit the type E sockets.

What do Belgium's electrical outlets look like?

When you are going on a trip to Belgium, be sure to pack the appropriate travel plug adapter that fits the local sockets. But what do those electrical outlets look like?

In Belgium, types C and E are the official standards. They are fully compatible with the German type F system, which is used almost everywhere else in Continental Europe.
