

What is the Slovenian power station

Overview

Where does Slovenia's electricity come from?

Approximately one-third of Slovenian electricity consumption is derived from two brown-coal and lignite fired power stations. These ageing power stations account for all of the domestically mined coal.

Which power stations are in Slovenia?

From Wikipedia, the free encyclopedia The following page lists all power stations in Slovenia. Nuclear[edit] Name Location Coordinates Type Capacity, MWe District heating Operational Manufacturer Notes Krško Nuclear Power Plant Krško 45°56'18"N15°30'56"E / 45.9382023; 15.5154258 (Krško Nuclear Pow PWR 696 MW.

What percentage of electricity is produced by hydroelectric power plants in Slovenia?

Hydroelectric power plants, which operate under the patronage of Dravske elektrarne Maribor and Soške elektrarne Nova Gorica, produced as much as 88 percent of all "green" electricity in Slovenia. This is due to good hydrological conditions and the high availability of the power plants throughout the year.

Is there a second nuclear power station in Slovenia?

Slovenia's infrastructure ministry has issued the Energy permit for the construction of a second unit at Krško, Slovenia's only nuclear power station, a step that allows permitting procedures to begin.

Why is there no new power plant construction in Slovenia?

Several decades of no new major power plant construction in Slovenia has driven the country, as well as some other countries, to a situation where the gap between consumption and production of electricity has become significant. The issue has become so serious that energy and climate policy has been placed at the top of all political debates.

Which generating station does Gen operate in Slovenia?

GEN operates the nuclear generating station in Krško (NEK), the thermal generating station in Brestanica, and two hydro generating stations on the river Sava. 2.1.4 NEK, the only nuclear generating plant in the country, produces 24.2% of all electricity generated in Slovenia.
