

# What should I pay attention to when buying a super battery cabinet

## Overview

---

### How to choose a battery?

It is advisable to consider warranties and choose a battery with a long period of free replacement. Warranty periods are measured by a figure combining the free replacement period and the prorated period. The prorated period allows for partial reimbursement of the purchase sum of the battery for a limited period of time.

### How to choose the right car battery size?

You can find out the battery size required by checking the owner's manual or consulting with your mechanic and then making a comparison between car batteries. The right battery size is the one that fits perfectly in the battery tray securing the battery and preventing damage arising from vibrations. 2. Battery Freshness.

### How do you know if a battery is fresh?

Battery freshness is indicated by a code on the battery which consists of a letter and number. The letter stands for the month whereas the number stands for the year of manufacture e.g. B/4 stands for February 2014. You should never buy a battery which is older than six months from the date of manufacture. 3. Reserve Capacity
