Which is the best super farad capacitor in Zagreb

Overview

What is a supercapacitor?

A capacitor which stores a huge amount of energy is known as supercapacitor. It is also known as an ultracapacitor or double-layer electrolytic capacitor. Supercapacitors have almost all similarities to capacitors, except for their bigger area plates and the smaller distance between these plates.

How many farads does a supercapacitor have?

It has a capacitance of 500 farads, a diameter of 35 millimeters, and a height of 68 millimeters. The manufacturer gives all buyers a 200-day warranty on the supercapacitor. That means if the supercapacitor does not work or malfunctions within the first 200 days after you purchase it, you will receive a replacement for free.

What are Eaton supercapacitors?

Eaton supercapacitors are unique, ultra-high capacitance devices utilizing electric double layer capacitor (EDLC) construction combined with new, high-performance materials.

What is a yutokeer supercapacitor?

The YUTOKEER 2.7V 500F Capacitor is a 2-piece 2.7-volt supercapacitor with 500 farads. It is made of metal foil and takes the shape of a large can. When you're ready to install the supercapacitor into your device or circuit, it has a snap-in terminal to simplify the process.

Can a supercapacitor be used as a secondary battery?

Supercapacitors have characteristics that are common to both batteries and traditional capacitors. As a result, a supercapacitor can be used as a secondary battery when applied to a DC circuit. These devices are best suited for use in low voltage, DC hold-up applications such as embedded microprocessor systems with flash memory.

Who is isofarad Kft?

Home - Isofarad Kft. Isofarad Ltd. was founded in 1992 by electrical engineers specialised in designing and manufacturing medium- and high voltage capacitors. Continuing the work of the former, state-owned company, the Mechanikai Művek, our company first manufactured medium voltage capacitors, mainly for power factor correction (PFC).
