Wholesale 300wh power station in Norway

Overview

Who buys and sells electricity in Norway?

Power producers, suppliers, industry and other participants buy and sell power in competition with other market participants in the electricity wholesale market. The wholesale market facilitates export from, as well as import to, Norway.

What type of energy does Norway use?

Norway's electricity generation is based on almost 100 per cent renewable energy. In 2023, it was based on 89 per cent hydropower and 9 per cent wind power. At the beginning of 2023, the power supply in Norway had a total installed production capacity of 39 703 MW.

What is a weather-based power system like Norway?

In a weather-based power system like Norway's, the power situation will vary between different parts of the country, and there is not enough capacity in the power grid to equalise the differences in all situations. Therefore, the grid is divided into five price zones.

Does Nord Pool sell electricity in Europe?

It operates the leading power market in Europe, offering day-ahead and intraday markets for electricity trading across 16 countries. Nord Pool runs the leading power market in Europe, offering day-ahead and intraday markets to our customers.

How much power does Norway produce in 2023?

In 2023, it was based on 89 per cent hydropower and 9 per cent wind power. At the beginning of 2023, the power supply in Norway had a total installed production capacity of 39 703 MW. In a normal year, Norwegian power plants produce about 156 TWh (source: Electricity production - Norwegian Energy).

How much power does Norway produce a year?

In a normal year, Norwegian power plants produce about 156 TWh (source: Electricity production - Norwegian Energy). The power production per year fluctuates depending on water inflow to the reservoirs. Still, hydropower is the only form of renewable energy production that can be adjusted based on demand.
