Why is the solar energy storage cabinet not working

Overview

Why are my solar panels not producing electricity?

If your panels aren't producing any electricity when you'd expect them to, it's most likely a fault with the inverter or problem with the wiring. Occasionally the generation meter might fail. If this happens, you'd see no recorded generation, even though the system is working.

Why is my SolarEdge home battery not working?

It might be that your SolarEdge Home Battery is attempting to activate but does not have sufficient power. This could be caused by multiple electrical appliances that are consuming a lot of power. In this case we recommend you to perform the following steps: Check that the battery circuit breaker is ON.

Do you have problems with your solar panels?

Nearly seven in 10 owners had had no problems with their solar panels in our survey of over 2,000 owners.* The most common – and most serious – problem owners face is with the inverter. In some cases inverter problems mean you don't get any usable renewable electricity. It can also be a pricey problem to fix.

Why is my solar inverter NOT working?

It's also possible that the DC power from the solar panels has been lost, explains Mr Robinson. This could be caused by the DC rotary isolator being switched off, connectors from positive and negative cables being disconnected or the DC cables severed. Check if your inverter is still within its warranty. If so, contact the company about the fault.

Do solar panels produce less power?

Less-than-perfect weather conditions are a fact of solar pv life and there's nothing you can do about it. Solar panels also degrade gradually over time. So, after a decade of ownership, your panels might produce slightly less power

than they did when new.

Do solar panels degrade over time?

Solar panels also degrade gradually over time. So, after a decade of ownership, your panels might produce slightly less power than they did when new. You can find the expected degradation of your panels on their datasheet (search online for it using their make and model: find this on your MCS certificate).
