# Winter Solar Water Pump

## Overview

---

What is a solar water pumping system?

A solar water pumping system consists of a PV array, a motor, and a bore pump. Solar water pumping arrays can have permanent mounts, or installers may place them on passive trackers to increase pumping time and volume. Both AC and DC motors with centrifugal or displacement pumps are used in these circumstances.

What is a motion controlled winter watering system?

The Motion-Controlled Winter Watering System is the ultimate winter system because it is 100% freeze-proof when installed and maintained properly. It does not require an artificial heat source regardless of how few animals may be using the system.

Does Sundog Solar have a deluxe pump?

Sundog Solar has released a new SD Deluxe pump with more horse power, a larger intake and outlet. This pump is powered by the sun to deliver in the harshest of wintering conditions. Energy is stored in our heavy duty insulated and lockable battery box that is positioned beside the wet well.

How does a float pump work?

This pump is powered by the sun to deliver in the harshest of wintering conditions. Energy is stored in our heavy duty insulated and lockable battery box that is positioned beside the wet well. A motion eye turns the pump on and off which replaces freezing issues that occur with float switches in the winter.
