Yamoussoukro No 1 Middle School Solar System

Overview

What will the students learn about the Solar System?

The students will learn about the Solar System. The students will be able to define the terms: sun, planet, dwarf planet, satellite, asteroid, comet, and meteor. The students will be able to name the planets of the Solar System. The students will be able to explain how the sun is the center of the Solar System.

How do you teach students about the Solar System?

Give each student a “What I Know About the Solar System” worksheet. Have the students write as much as they know about the Solar System. Review once the students have completed the worksheet. Give each student an “All About the Solar System” Science Journal. Review the unit topics and the science journals with the students.

Is science E-module based on Qisi effective in solar system learning?

Science e-module is effectively used in learning, with the result of obtaining an N-gain value of 0.62. So, it can be concluded that the science e-module based on QISI has been successfully developed which is very valid, practical, and effectively used in solar system learning .

What is a Solar System Unit?

The Solar System unit reveals detailed facts about our Sun and the planets. It also addresses other components of our solar system, including dwarf planets, moons, asteroids, and comets. Certain reading resources are provided at three reading levels within the unit to support differentiated instruction.

How long does it take to complete a solar system worksheet?

The students will write down everything they know about the Solar System. The students will have about 10 minutes to complete the worksheet. Once the students have completed the worksheet, the teacher should review. The

worksheets should be collected and kept with the teacher until the final lesson of the unit.

Is the Solar System a difficult object to visualize?

Other pertinent research indicates that the solar system is a difficult object to visualize because it cannot be seen directly, so an innovative learning medium is required (Imronah et al., 2022; Zahara et al., 2020).
